VI. Read the passage, then decide if the statements that follow it are True or False.

Our oceans are becoming extremely polluted. Most of this pollution comes from the land which means comes from people. First there is raw sewage, which is pumped directly into the sea. Many countries both developed and developing are guilty of doing this. Secondly, ships drop about 6 million ton of garbage into the sea each year. Thirdly, there are oil spills from ships. A ship has an accident and oil leaks from the vessel. This not only pollutes the water but it also kills the marine life. Next, there are waste materials from factories. Without proper regulations, factory owners let the waste run directly into the rivers, which then leads to the sea. And finally, oil is washed from land. This can be the result of carelessness or a **deliberate** dumpling of waste.

23. Sea pollution is mainly caused by people in many countries. _____

24. Oil from ship accidents and oil washed from land are not harmful to living things. _____
